Gov.uk – Department of Education Guidance - Coronavirus (COVID-19): guidance for educational settings - Updated 1<sup>st</sup> June 2020

### What happens if someone becomes unwell at an educational or childcare setting?

If anyone in an education or childcare setting becomes unwell with a new, continuous cough or a high temperature, or has a loss of, or change in, their normal sense of taste or smell (anosmia), they must be sent home and advised to follow the COVID-19: guidance for households with possible coronavirus (COVID-19) infection guidance.

If a child is awaiting collection, they should be moved, if possible, to a room where they can be isolated behind a closed door, depending on the age of the child and with appropriate adult supervision if required. Ideally, a window should be opened for ventilation. If it is not possible to isolate them, move them to an area which is at least 2 metres away from other people.

If they need to go to the bathroom while waiting to be collected, they should use a separate bathroom if possible. The bathroom should be cleaned and disinfected using standard cleaning products before being used by anyone else.

PPE should be worn by staff caring for the child while they await collection if a distance of 2 metres cannot be maintained (such as for a very young child or a child with complex needs).

In an emergency, call 999 if they are seriously ill or injured or their life is at risk. Do not visit the GP, pharmacy, urgent care centre or a hospital.

If a member of staff has helped someone with symptoms, they do not need to go home unless they develop symptoms themselves (and in which case, a test is available) or the child subsequently tests positive (see ‘What happens if there is a confirmed case of coronavirus (COVID-19) in a setting?’ below). They should wash their hands thoroughly for 20 seconds after any contact with someone who is unwell. Cleaning the affected area with normal household disinfectant after someone with symptoms has left will reduce the risk of passing the infection on to other people.

### What happens if there is a confirmed case of coronavirus (COVID-19) in a setting?

When a child, young person or staff member develops symptoms of coronavirus (COVID-19): a high temperature, new and persistent cough or a loss of, or change in, normal sense of taste or smell (anosmia), however mild, they should self-isolate for at least 10 days from when the symptoms started; or if they are not experiencing symptoms but have tested positive for coronavirus (COVID-19) they should self-isolate for at least 10 days starting from the day the test was taken.

If they have tested positive whilst not experiencing symptoms, but develop symptoms during the isolation period, they should restart the 10 day isolation period from the day they develop symptoms.

This only applies to those who begin their isolation on or after 30 July 2020.

Where the child, young person or staff member tests negative, they can return to their setting and the fellow household members can end their self-isolation.

Where the child, young person or staff member tests positive, the rest of their class or group within their childcare or education setting should be sent home and advised to self-isolate for 14 days. The other household members of that wider class or group do not need to self-isolate unless the child, young person or staff member they live with in that group subsequently develops symptoms.

As part of the national test and trace programme, if other cases are detected within the cohort or in the wider setting, Public Health England’s local health protection teams will conduct a rapid investigation and will advise schools and other settings on the most appropriate action to take. In some cases a larger number of other children, young people may be asked to self-isolate at home as a precautionary measure – perhaps the whole class, site or year group. Where settings are observing guidance on infection prevention and control, which will reduce risk of transmission, closure of the whole setting will not generally be necessary.

## COVID-19 –Isolation Rooms & Further Guidance

Health & Safety  
COVID-19 Procedures  
UCB-COVID H&S006

Nominated isolation rooms for persons showing/suffering symptoms of COVID-19:

**Summer Row** – Former Guild Office – Ground Floor (opposite former Resource Centre)

**Richmond House** – Interview/Meeting Room – Ground Floor Reception

**The Link** – currently one of the student services/counselling meeting room on the ground floor (formerly a general meeting room for Student Services – **G3**), however we have discussed that when we re-open, this will have to change. Are we able to continue to use this room once SS is fully operational?

**McIntyre House** – The First Aid Room – Ground Floor. Opposite the Leap of Faith statue.

**Moss House** – limited on options, however we would propose to utilise the McIntyre House first aid room.

**Camden House** – currently the meeting room on the left as you walk into the Ground Floor Technology Hub.
